Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-41, drawn to a system for the simultaneous storage and playback of multimedia data including the feature of "a bridging element connected to said decoder/host controller by meansis individualized according to source type", classified in class 386, subclass 109.
- II. Claims 42-61, drawn to a system for processing a media stream across several channels simultaneously including the feature of "means for monitoring and saving state of the processor.....a state associated with said original stream is reloaded", classified in class 386, subclass 46.

2. The inventions are distinct, each from the other because of the following reasons:

The two groups of inventions are useable apart from each other and have unique specific structures not required of the other, and can therefore be separately useable as distinct inventions. For example, the system for the simultaneous storage and playback of multimedia data including the feature of "a bridging element connected to said decoder/host controller by meansis individualized according to source type" as recited in claim 1 of Group I, does not require the feature of "means for monitoring and saving state of the processor.....a state associated with said original stream is reloaded" as specified in claim 42, of Group II.

Moreover, the system for processing a media stream across several channels simultaneously including the feature of "means for monitoring and saving state of the

processor.....a state associated with said original stream is reloaded" as specified in claim 42, of Group II, does not require the feature of "a bridging element connected to said decoder/host controller by meansis individualized according to source type" as recited in claim 1 of Group I.

3. Because these inventions are distinct for the reasons given above and the search required for one Group is not required for the other, and have acquired a separate status in the art and because of their recognized divergent subject matter restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
